About our sponsor, the D. E. Shaw group

The D. E. Shaw group is a global investment and technology development firm with an international reputation for financial innovation and technological leadership. Headquartered in New York, the D. E. Shaw group encompasses a number of closely related entities with more than 1,000 employees and approximately \$32 billion in investment and committed capital. Our activities range from deployment of investment strategies based on mathematical models or human expertise to the acquisition of existing companies and the financing or development of new ones.

The firm employs a disproportionate number of the world's leading computer scientists and mathematicians, many of whom joined the firm directly from leading college and university math and science programs, and a number of whom are former ARML competitors. Given the challenges of its work, the firm has a particular interest in promoting excellence in mathematics. For this reason, the D. E. Shaw group is especially proud of its years-long association with ARML and of its current sponsorship of the national competition.

ARML would like to express special thanks to the D. E. Shaw group for their generous donation and sponsorship of our competition.
